KITCHEN UNITS ARE MADE BY CRAFTSMEN

Madam, Paul kitchen equipment was designed for you. It was designed to make your working life easier, to give you less stooping, less walking, less cleaning. It was planned by architects to make kitchens more hygienic, more handsome and much easier to run.

What you can't see and only experience will reveal is the deep, ingrained quality of all Paul equipment. It is made of the finest quality stainless steel and heavy aluminium. The sinks are completely sound-deadened, and the aluminium cabinets are specially treated - to stop flaking or peeling - before being stoved with a hard gleaming enamel that will last a lifetime. All drawers glide in and out on stainless steel slides. Nothing buckles, rattles or rusts if it made by Paul of Breaston.

PAUL IN THE FASHION - FOR GOOD!

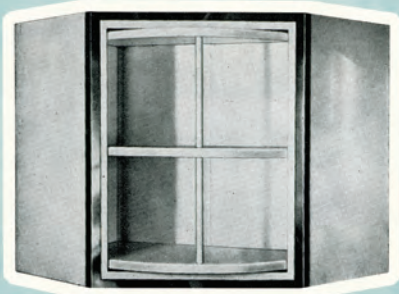

Can you imagine this picture twenty years from now? Only the pretty lady in the kitchen will have changed - not the Paul units of which she is so proud. For these units are made to beat time - made to withstand hard labour and still show a surface as new as the day they were bought.

From the infatuation you automatically feel for the *eye appeal* of Paul kitchen units grows an affection which can only be born of experience. Here is a partner in the kitchen and a servant that gives the entire family a lifetime of service.

Written in 1959, how true was this prediction? The Style of Paul has gone full circle and is again at the cutting edge of design.

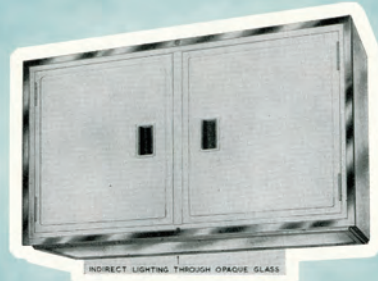

Once fully restored by Source, they're good for another 50 years!

CORNER WALL CUPBOARD

Aluminium with Stainless Steel Facings and fitted with shelf.
Length: 24½" Depth: 12" Height: 22¾"

TIMING CLOCK

A Timing Clock can be incorporated in any unit at a small extra cost. This is a useful accessory which is becoming very popular in the kitchen.

At Source we pride ourselves on the quality of our restoration. Every component is taken back to the bare metal and re-finished in the colour of your choice.

We take great care with this iconic design but after 50 years of work, most units do show signs of a good hard life.

Not all units are always available, please contact us to check on specific availability.
